TENDER FOR THE ANALYSIS FOR THE PRESENCE OF ORGANIC POLLUTANTS IN POLISHED TREATED SEWAGE EFFLUENT SAMPLES FOR THE MEDIWAT PROJECT

Question 1: Could you courteously specify the number of samples which must be carried out in order to respond to the object of the contract, or if you need to perform a single sampling for all parameters?

The tender document envisages a minimum of 5 samples. However, the Authority reserves the right to order the analysis of further samples.

It is noted that not all samples will necessarily be included in one batch, but a number of batches might be necessary.

Clause 8.9.1 of the tender document refers.
