

MALTA RESOURCES AUTHORITY

MRA/133/2012

1st August 2011

Call for quotations for the provision of support services in relation to an investigation on the coastal subsurface groundwater discharge flow dynamics (MORISO Project)

Question 1: In Paragraph 1, Objective describes that the investigation “will entail measuring electrical conductivity of sea-water in a number of identified areas around the coast of the Maltese islands. These measurements will be undertaken at sea-level and in the immediate sub-surface (0-5m).”

However in Paragraph 3, Specifications, services related to diving training etc. are required.

Can you kindly confirm whether you also require services related to Paragraph 1 please?

Reply: It is clarified that this tender is for support services to the field exercise in question. Filed measurements will be undertaken by MRA staff.
