8.4 Services Required

8.4.1 Background

Under the Fuel Quality Directive obligations 98/70/EC (as amended) and the Directive 99/32/EC for the sulphur content in certain liquid fuels, the MRA has to ensure that the fuel quality used in Malta remains within acceptable limits and conforms to appropriate standards. The Fuel Quality Directive governs the quality of all local transport fuels including EN 228 (petrol), EN 590 (diesel) and biodiesel. All obligations of inland fuel quality standards and upkeep thereof (including up to offshore 12 nautical miles), are part of the MRA's remit.

In order to ensure compliance with L.N. 44 of 2008 Articles 4 to 7 *Quality of Fuels Regulations*, sample lifting will be carried out by the Licensing, Competence and Enforcement Unit within the MRA. Sample lifting will take place from petroleum filling stations, road tankers, marine vessels and primary and secondary storages anywhere on the islands. These inspections will continue to serve as a deterrent for attempts of abuse by means of fuel adulterations.

8.4.2 Terms of Reference of the Work

Samples will be normally lifted by MRA compliance officers from any storages or during the fuel distribution on land and up to 12 nautical miles out at sea.

The main objective of these inspections is to carry out testing to determine the percentage content of various constituents of fuel as per below:

1. Diesel, all Gasoils, LHO, HFO, MGO etc. - Sulphur and /or FAME content
2. Diesel and Unleaded Petrol Full tests and individual parameters of the fuel – according the EU Fuel Quality Monitoring System (FQMS) and the schedules of L.N. 44 of 2008
3. Biodiesel – various parameters

8.4.3 Details of the work involved

The services sought by the MRA are to help curb all possible fraudulent activities that could be carried out by fuel distributors, fuel wholesalers and petrol station operators and possible claims arising from such activities. These include the adulteration of fuel in various storage sites including the petroleum filling station tanks and auxiliary tanks.

The following services of the multi-purpose laboratory/ies are required:

- a. To test for the value of various fuel components in relation to the petroleum market legislated under the *Quality of Fuels, Regulations* (or L.N. 44 of 2008) issued under the Malta Resources Authority Act, in order to help the MRA monitor the fuel quality within all Maltese territory.

After the 90 days have elapsed, no sample should be disposed of without a written instruction from an MRA representative. If samples are found to be out of specification and thus against the Law, these should be retained indefinitely by the laboratory even after the above mentioned period. The rates for storage should be included in the rates for analysis.
- d. To dispose of samples. Sample disposal is to be carried out at the cost of the tenderer after an authorisation in writing by an MRA representative. The laboratory is expected to dispose of the samples in an adequate manner and abiding to environmental laws. The fuel testing laboratory/ies will be requested to submit an environmental policy on how it will dispose of (or is disposing) any of the fuel samples provided and any cleansing agents used for receptacles and /or sample bottles. The environmental risks due to the disposal of all fuels may be requested.
- e. Personnel performing analytical analysis, may be summoned for eventual court sittings. The contact details and information belonging to these individuals should be disclosed if requested by the Police /court order. An estimate of the current court orders per year are three.
