Clarification No. 2

Re: The Total Number of Inspections on which Adjudication shall be Based

Solely for adjudication purposes, in this Call for Quotations document, the total number of inspections was indicatively set at forty (40), distributed as follows:

- thirty (30) inspections of groundwater sources in Malta and respective reporting; and
- ten (10) inspections of groundwater sources in Gozo and respective reporting.

Out of these forty (40) inspections, five (5) inspections shall include measurement of the depth of the groundwater source and respective reporting and thirty-five (35) inspections shall not.

However, the Contracting Authority shall not bind itself by these figures, which were indicatively set in the Call for Quotations document solely for adjudication purposes, and it reserves the right to hold as many such tests as it deems fit.
