Clarification No 1

Supply, Delivery and Installation of fully galvanized Modular Metal Shelving for the MRA Archives

Question 1: With reference to the call for tenders in caption, I would like a clarification regarding the free-standing shelving units required. We would like to be sure that the units will NOT be affixed to each other and each unit stands independently of the rest, as this would have an incidence on the number of frames required.

As stated in Section 7, Supplies required, the shelving racks should be free standing.

Question 2: In addition, we would like to know what the delivery times for the delivery and installation are from confirmation of the contract order.

It is expected that the delivery and installation of the shelving be completed within 6 weeks of the award of the contract. However, other delivery periods may also be considered.
