Clarification Note 10

16<sup>th</sup> September 2013

**Tender: Acquisition of an underwater remotely operated vehicle (ROV)**

**Question 1:** With regard to clarification no 5 i need to press on because I still find the reply unclear, there are basically 3 dimensions. Vertical - ie up and down, Horizontal - ie forward and backward, and Lateral ie to one side or another (sideways). Please clarify that you want the vehicle to move in 3 dimensions.

**Reply 1:** It is noted that clarification no 5 clearly states that the ROV needs to be able to be maneuvered in any direction required by the operator, namely:

- (i) vertical – up and down
- (ii) horizontal – forward and backward
- (iii) lateral - sideways
