

MALTA RESOURCES AUTHORITY

MRA/WAT/19/2013

Clarification Note 2

12th September 2013

Tender: Acquisition of an underwater remotely operated vehicle (ROV)

Question 1: We have read the document and noticed that in some parts of the document one gets the impression that the tender is not solely for the supply of the ROV but also for the actual operation of the vehicle. In particular we are referring to the special conditions and in particular 7.1.9. wherein the contractor (as in us) would be responsible for the operation of the plant during works. If we are going to be responsible for the plant during the time when you are operating the vehicle that would entail a completely different type of tender proposal to a simple delivery and commissioning of an ROV.

Reply: It is clarified, that the tender is solely for the purpose of the supply of the ROV.
